

Monthly Sales Revenue and Sales Volumes for the period ending August 31, 2015

September 15, 2015 - International Barrier Technology Inc. ("Barrier") (IBTGF: OTCQB; IBH: TSXV), a manufacturer of proprietary fire-resistant building materials has released monthly sales revenue and sales volumes results for the period ending August 31, 2015.

Overall sales revenue generated for the month of August 2015 was 28% lower relative to the revenue generated in August 2014 (\$596,228 vs. \$829,485). Sales volume, as measured by the surface area of product treated, was lower by 27% at 1,530,160 sq. ft. versus the 2,082,120 sq. ft. that was shipped in August 2014.

Sales into the Commercial Modular segment decreased this month. Sales volume shipped to Commercial Modular was down 37% in August, year over year, and sales revenue down by 29%. This monthly decline follows several strong months in this market area so is likely related to project timing.

Volume shipped into the Residential Roof Deck/Wall Assembly/Structural Insulated Panel markets decreased by 22% for the month of August, year over year. Sales revenue into the Residential Roof Deck/Wall Assembly/Structural Insulated Panel market also decreased by 22%.

Barrier increased R&D efforts during the month on testing I-Joist manufacture techniques and this continued to impact normal production flow. Order file remains strong and Barrier continues to anticipate production flow to gradually improve month to month as additional experience is gained in producing this new product.

About International Barrier Technology Inc.

International Barrier Technology Inc. (OTCQB: IBTGF; TSXV: IBH) develops, manufactures, and markets proprietary fire-resistant building materials branded as LP[®] FlameBlock[®] Fire-Rated OSB Sheathing and Blazeguard[®] FR Deck Panel. Barrier's award-winning fire-resistant wood panels use a patented, non-toxic, non-combustible coating with an extraordinary capability: it releases water in the heat of fire. The panels exceed "model" building code requirements in every targeted fire test and application, and are unique in combining properties that increase panel strength and minimize environmental and human impact. Barrier's family of products provides customers a premium material choice meeting an increasingly challenging combination of requirements in residential and commercial building construction.
