

Monthly Sales Revenue and Sales Volumes for the period ending October 31, 2016

November 21, 2016 - International Barrier Technology Inc. ("Barrier") (IBTGF: OTCQB; IBH: TSXV), a manufacturer of proprietary fire-resistant building materials has released monthly sales volumes and sales revenue results for the period ending October 31, 2016. Shipments grew 46% to 2,560,728 sq. ft., vs. 1,759,016 sq. ft. shipped October 2015. Of this total volume of shipments, sales into the Residential Roof Deck/Wall Assembly/Structural Insulated Panel markets increased by 83%, and shipments into the Commercial Modular market decreased 51%.

Overall sales revenue generated for the month of October 2016 was \$875,290 in comparison to \$712,523 generated in October 2015. Sales revenue into the Residential Roof Deck/Wall Assembly/Structural Insulated Panel market increased by 83% and Revenues into the Commercial Modular industry decreased 51%.

Overall sales have remained on a growth path the past several months due to significant sales efforts in anticipation of the additional capacity coming on-line soon at the Clarke-County facility. There has been a recent decline in Commercial Modular business, which is likely two-fold: recent overall market decline, and the firming up of OSB substrate price in the market. Our prices have increased with the OSB commodity, while competitive product pricing using other substrate products has remained more static. We are hopeful sales into this market will recover into next year.

About International Barrier Technology Inc.

International Barrier Technology Inc. (OTCQB: IBTGF; TSXV: IBH) develops, manufactures, and markets proprietary fire-resistant building materials branded as LP[®] FlameBlock[®] Fire-Rated OSB Sheathing and FR Deck Panel. Barrier's award-winning fire-resistant wood panels use a patented, non-toxic, non-combustible coating with an extraordinary capability: it releases water in the heat of fire. The panels exceed "model" building code requirements in every targeted fire test and application, and are unique in combining properties that increase panel strength and minimize environmental and human impact. Barrier's family of products provides customers a premium material choice meeting an increasingly challenging combination of requirements in residential and commercial building construction.
