
InvestorIdeas.com® Announces Upcoming Online Greentech Investor Conference "Investing in the Environment: Global Warming, Global Warning – Investing Today for Tomorrow's Future"

As the Fight Against Climate Change has Become a Global Priority, the Online Conference will Explore Investing Opportunities

POINT ROBERTS, WA and DELTA, BC – January 12, 2007, www.investorideas.com, and its greentech portals, global investor and industry resources for the renewable and clean tech sector, announce its upcoming online investor conference on Investing in the Environment available March 21st, 2007, starting at 9:00 am EST and archived thereafter. With issues of global warming and energy independence in the forefront, cleantech investments continue to rise as political support strengthens. The online conference will include presentations (audio with power point slides) from renewable, environmental, clean energy and technology experts as well as public company CEO's providing in-depth perspectives on what is happening in the Greentech sector. Current participating public companies include **ZAP (OTCBB: ZAAP)**, **Rotoblock Corporation (OTCBB: ROTB)**, **WaterBank of America, Inc. (OTCBB: WBKA)** and **International Barrier Technology Inc. (OTCBB: IBTGF)**.

As Speaker of the House Nancy Pelosi calls for, "a new America that declares our energy independence, promotes domestic sources of renewable energy, and confronts climate change," and Governor Arnold Schwarzenegger proposes a Low Carbon Fuel Standard to reduce green house gas emissions by at least 10% in California by 2020, support for 'green' technology shows continued signs of growth.

It is clear that the fight against climate change has become a global priority evidenced by the recent proposal from the European Commission for the establishment of a new Energy Policy for Europe to combat climate change and increase energy security. In addition, investment into 'green' technology continues to grow domestically and internationally. According to the Cleantech Venture Network, cleantech investment for Q3'06 comprised 14% of all North American, and 12% of all European venture investments totaling \$1.081 billion for the quarter.

The online conference is free to investors and online visitors, with login registration.

Rotoblock Corporation (OTCBB: ROTB) is focused on the continued development and improvement of its energy efficient Oscillating Piston Engine to the state where its mechanical, ecological and economic viability leads to the profitable licensing of the manufacturer's rights to a proprietary patented design or a partnership for its manufacture. For More Info: <http://www.renewableenergystocks.com/CO/ROTB/Default.asp>

WaterBank of America, Inc. (OTCBB: WBKA) was founded in 2002 to create and acquire a "bank" of top quality springs to address the increasing scarcity of fresh water in the world. In 2004, with the acquisition of ICEROCKS, the business model expanded to include the new consumer packaged good; hygienic, food safe ice cubes (targeting hotels, airlines), followed by the manufacturing and distribution of bottled spring water on a regional basis as a complementary business. For More Info: <http://www.water-stocks.com/CO/WBKA/Default.asp>

International Barrier Technology Inc. (OTCBB: IBTGF) develops, manufactures, and markets proprietary fire resistant building materials branded as Blazeguard®. Barrier's award-winning Blazeguard® wood panels use a patented, non-toxic, non-combustible coating with an extraordinary capability: it releases water in the heat of fire. The panels exceed "model" building code requirements in every targeted fire test and application, and are unique in combining properties that increase panel strength and minimize environmental and human impact.
