*December 13, 2006*

***International Barrier Technology - Fire Resistant Building Materials  
Company Reports Record YTD Revenue; Record Sales Volume for  
November 2006***

*Growth Remains Strong in Residential Roof Deck and Commercial Modular Markets*

**Watkins, MN; Vancouver, BC December 13, 2006** - International Barrier Technology Inc. ("Barrier") (IBTGF: OTCBB; IBH: TSXV), a manufacturer of proprietary fire resistant building materials, is pleased to report record year to date sales revenue and sales volume shipped. Four million, three hundred ten thousand, nine hundred sq. ft. (4,310,900) of Blazeguard products have been shipped year to date. This is an increase of 55% from the 2,777,900 shipped during the same period last year. Shipments for the month of November were 742,700 sq. ft., up from the 687,500 shipped in November 2005.

Year to date sales revenue increased 33% from \$2,385,476 to 3,178,579. During this period sheathing costs, which are a pass through commodity, continue near all-time lows. This kept top-line sales revenue lower than what it could have been had sheathing prices been at or above average historical prices.

Sales volumes into the residential roof deck market grew 82% to 2,518,000 during this time and commercial modular sales rose 28% to 1,777,900 sq. ft.

"The additional production from the new manufacturing line has enabled Barrier to meet the increased demand for our products and helped to reduce lead times for shipment," states Dr. Michael Huddy, President. "While regional inventory adjustments in some townhome markets will impact the rate of sales over the winter months, steadily increasing commercial modular sales will set the stage for continued strength in overall sales volume."

**About International Barrier Technology Inc.**

International Barrier Technology Inc. (OTCBB: IBTGF; TSXV: IBH) develops, manufactures, and markets proprietary fire resistant building materials branded as Blazeguard®. Barrier's award-winning Blazeguard® wood panels use a patented, non-toxic, non-combustible coating with an extraordinary capability: it releases water in the heat of fire. The panels exceed "model" building code requirements in every targeted fire test and application, and are unique in combining properties that increase panel strength and minimize environmental and human impact. Blazeguard® provides Barrier's customers a premium material choice meeting an increasingly challenging combination of requirements in residential and commercial building construction. Blazeguard® customers include four of the five top US homebuilders.
